

CONTACTLESS CHECK-IN

SAFE & SECURE GUEST MANAGEMENT

Check-in is a vital part of understanding who has visited your location and ensuring guests can be traced. Encore's contactless system is safe, simple and fast making sure there is no need to queue.

MANAGING GUEST ARRIVAL

Guests can self check-in in a safe, socially distanced way. The process is simple:

- > Scan the QR code using your mobile phone
- > Enter contact details on a branded website landing page

BENEFITS

- > Simple and contactless guest self check-in
- > Send email alerts to guests
- > Accurate reports for contact tracing

SECURITY COMPLIANCE

The physical infrastructure for our check-in solutions is hosted and managed within Amazon's secure data centres and runs on Amazon Web Service (AWS).

The platform is GDPR and ISO data security compliant and Encore can manage the controls on your behalf.

One of the main reasons for our decision to select Amazon hosting is their approach to security. Amazon continually manages risk and undergoes recurring assessments to ensure compliance with industry standards. Amazon's data centres have the following accreditations:

- > ISO 27001
- > SOC 1 and SOC 2/SSAE 16/ISAE 3402 (Formerly SAS 70 Type II)
- > PCI Level 1
- > FISMA Moderate
- > Sarbanes-Oxley (SOX)

QUESTIONS AND ENQUIRIES

Encore welcomes the opportunity to discuss this new service in more detail. Please contact the team:
